Christmas Baubles That Link the Traditionalism of Christmas to the Contemporary Design

Christmas Balls are decorations for the Christmas Tree created by the **Caoscreo brand**, which combines **steel** with the **meticulous shapes of Christmas symbols**. According to the manufacturer, the gift box includes five traditional subjects of Christmas design, thus linking the traditionalism of Christmas to the contemporary design. The reindeer, the Christmas Fir, the snowflake, the ball, and the star – decorations made of elegant shiny metal. By folding the engraved internal parts, it is possible to obtain three-dimensional spheres which, hit by the light, create precious reflections. A festive holiday idea to decorate your interior spaces or to display a nice Christmas present.
